EXCEED YOUR VISION

Epson
EMP **1815/1810**

3LCD

Powerful and portable – big performance
in any room

EPSON

Quality and control wherever you present

Make a serious impact in a fixed setting or on the move with these lightweight 3500 lumen projectors. Set up quickly, project images with amazing Epson 3LCD quality and bring new levels of versatility and style to the way you present.

Epson EMP **1815**

No PC required – access and project files directly via the built-in Compact Flash slot

Everything you need for a great presentation

- Fast USB connection – no more VGA cables!
- Present directly through wireless or wired networks
- Project 80" images from just 2.4m with 1.6x zoom ratio
- Run up to 4 projectors from one computer for panoramic images, or multi-screen productivity
- Keep file transmission secure with market-leading wireless security

EasyMP™

Pause presentations quickly with the AV mute slide. It also protects the lens when in transport or storage

Epson EMP **1810**

Superb presenting made simple

- Work fast with 6 second set up
- Superb quality images with Epson 3LCD technologies
- Incredible 3500 lumens projector packed into just 2.9kg
- Pause presentations easily with AV mute slide
- Direct power off – instant disconnection of power after presentation

Can be ceiling mounted and connected directly to the room's power switch for easy power on/off
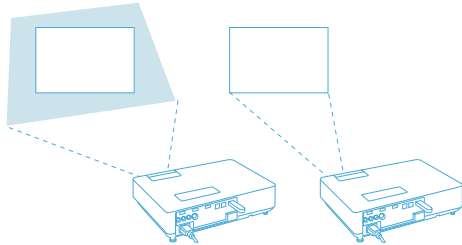

Compact and easily portable with soft carry case

Seamless Network Integration; wireless or wired

Your EMP-1815 projector can be quickly integrated into your local area network with direct RJ45 connectivity. Take full control of your projector remotely, monitor its status, and even project your presentations via the network. And we provide the best projector wireless security available to ensure that you control access to your data and presentations.
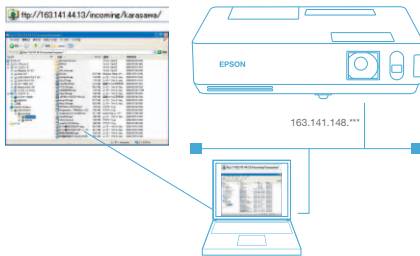

Integrate your projector into your local network wirelessly or with cables.

One button for a perfect image

It takes just six seconds to achieve a super-bright, uniform image. Simply press 'Quick Setup' and the projector will automatically create a perfect image for you. Screen frame detection technology automatically fits the image to the screen, and if there's no screen, brightness peak detection gives you great pictures on a wall. And with super fast shutdown, you can unplug and be on your way as soon as you're finished.

Start presenting quickly with 6 second auto setup.

Compact Flash versatility*

Make standalone presentations or photo slideshows simply and directly with the Compact Flash card reader. When the card is inserted in the projector, you can even rewrite stored information via the local network using ftp. As cards don't need to be removed, this is very useful for ceiling mounted projectors. CF cards are also an easy way to transport files between venues. You can even plug in the CF card from a digital camera.
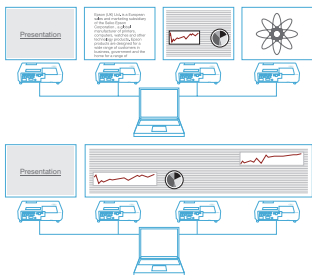

Standalone presenting via the Compact Flash memory card slot.

PC free flexibility*

Presenting without a PC makes the whole process smoother and simpler. You can leave your PC at home and move around even more easily. In addition to Compact Flash memory cards, you can present directly from a USB memory stick – or even SD, Memory Stick, or MicroDrive media (with optional adapters). Simply connect your memory device to the CF memory card slot or USB port and you're ready to go.

Make standalone presentations from a range of memory cards and devices.

Innovative multi-screen display*

Now you have the power to make a really big impact, with up to 4 projectors presenting from just one computer simultaneously, and even wirelessly. Either choose a large panoramic image, or 4 independent pictures to offer your audience a true multimedia experience.

Reach a wider audience with simultaneous display on multiple screens.
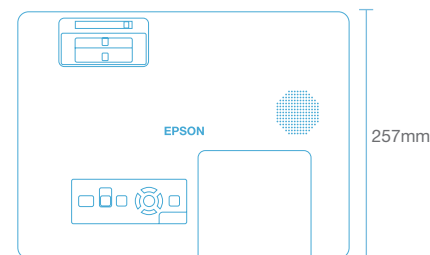

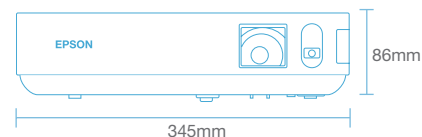

Connect to your EMP-1815 via USB

Save even more time by connecting your PC to your projector via the simple USB cable. There's no longer any requirement for the traditional VGA cable, and there's no need to change input and output signals manually either because with USB it's all done for you. The projector will recognise the signal and start projecting automatically.

Simple, fast USB connection to your PC – no need for traditional VGA cables.

* On EMP-1815 only
